

UML Component Diagram: Student Project Portfolio & Showcase App

Architectural Style: 3-Tier Client-Server Architecture (Problem Statement #04)

Student: Aarav Yuval B G | SRN: PES1UG24AM004 | Dept. of CSE (AI&ML), PES University

UML 2.5 COMPONENT NOTATION LEGEND

- Component («component»)
- Required Interface (Socket)
- Dependency («use»)
- Provided Interface (Ball)
- Assembly (Ball-Socket Binding)
- External System / Datastore

COURSEWORK COMPLIANCE & ARCHITECTURAL HIGHLIGHTS

- Architectural Pattern: 3-Tier Client-Server Architecture (Presentation, Application Services, Data & Caching Tier).
- 6 Components Modeled: API Gateway, Submission Manager, Evaluation Service, Voting & Anti-Sybil Engine, Leaderboard Aggregator, Media Repo.
- 6 Interfaces Illustrated: IExpoClientAPI, ISubmissionService, IEvaluationService, IVotingService, ILeaderboardService, IMediaStorage.
